
Toyo Ito premio Pritzker 2013 de arquitectura (Arquitectura)

19, marzo

El jurado dijo del arquitecto japonés "es un creador de edificios atemporales, con los que audazmente propone nuevos caminos. Su arquitectura proyecta un aire de optimismo, ligereza y alegría, y está impregnada de un sentido de unicidad y universalidad"...y si repasas las obra de este hombre de 71 años de edad de aspecto alegre y bondadoso es fácil darse cuenta de que efectivamente es así.

Por citar solo algunos; el pabellón temporal creado en Brujas, Bélgica, en 2002 y el edificio TOD'S en Tokio en 2004, cuyo revestimiento sirve también de estructura; la Cúpula de Odate en Japón, la Torre de los Vientos de Yokohama, la Mediateca de Sendai (2000), el Tanatorio de Gifu (2006), la Biblioteca Universitaria Tama Art de Tokio (2007) o el Pabellón de la Serpentine Gallery, en Londres (2002).

Enhorabuena!!

Thanks for the article. My partner and i have continually seen that a majority of people are wanting to lose weight simply because wish to show up slim and attractive. Nonetheless, they do not usually realize that there are other benefits so that you can losing weight as well. Doctors claim that over weight people have problems with a variety of health conditions that can be perfectly attributed to the excess weight. The great news is that people who sadly are overweight along with suffering from different diseases can help to eliminate the severity of their particular illnesses by losing weight. You'll be able to see a gradual but notable improvement with health if even a moderate amount of weight loss is accomplished. [hitech billsoft](#)

well, monetizing websites and stuffs should be great. making money on the internet is a great way to earn money" □□□□
===== Thanks for this article. I would also like to mention that it can end up being hard if you find yourself in school and simply starting out to create a long history of credit. There are many pupils who are only trying to live and have a good or beneficial credit history can sometimes be a difficult factor to have. [dse](#) □□

The two sides have been in the same pool in five of the eight Rugby World Cup tournaments to date but have only played each other four times because [Watch All Blacks Italy online](#) Typhoon Hagibis caused their scheduled meeting in the 2019 tournament. The first 11 meetings between the two sides since their first clash in 1987 were never played at the same venue, then two tests had been held back to back at the Stadio Olimpico in Rome.
